

Dryer Venting Box

**Overall Dimensions
without Finish
Trim Plate**

Model No.	Description
DVBOXPC	Dryer Venting Box

Performance Data

for dryer venting box

Material

- white high-impact polystyrene

Meets UL Standard 94HB Tests for Flammability

General Information

- saves space
 - recessed design for placement behind drywall
 - allows dryer to sit 4-6" closer to wall
- improves dryer efficiency
 - ensures a direct path between dryer and vent resulting in better air flow, reduced energy bills
- reduces fire hazard
 - no more kinks that result in lint build-up which can lead to fires
- ensures clean appearance
 - eliminates exposed drywall cuts
- installs easily
 - regardless of distance between studs, the mounting straps may be adjusted to ensure a stable, permanent installation
 - mounts in up or down position
